## Race Information

In April of 2006, Nazareth Area High School graduate and basketball standout Derek R. Kehoe was diagnosed with LMS. He lost his battle in October 2006 at the young age of 19. Leiomyosarcoma is a rare form of cancer, which affects about four people in every million. Presently there is no cure, only remission if it can be attained, and this rare cancer can reappear anywhere at any time. Because of its rarity, few doctors know how to treat it and it attracts very little research. With your charitable donations, we can fund more research and ultimately *find a cure*.
